

# Learn**English** Teens Science UK: Finger science – exercises

Do the preparation exercise first. Then, read the text about Finger science and do the exercises to check your understanding.

### **Preparation**

Match the vocabulary with the correct definition and write a - h next to the number 1 - 8.

1	to shrink	a.	the part at the end of your finger
2	to wrinkle	b.	a dried plum; it is black and has many lines on its skin
3	to grip	C.	to get smaller (sometimes an article of clothing can do this when you wash it)
4	treads	d.	to form small lines and folds on skin or material
5	a prune	e.	the lines on a tyre which help it stick to the road
6	your fingertip	f.	to hold something in your hand with great force
7	your index finger	g.	a small, glass ball which children play games with
8	a marble	h.	the finger next to your thumb

#### 1. Check your understanding: true or false

Circle True or False for these sentences.

1.	When we have a bath, the tips of our fingers sometimes become covered with lines and folds.	True	False
2.	Wrinkled fingertips are caused by water making our skin bigger.	True	False
3.	The lines on wet fingers are caused by changes in blood vessels in the fingers.	True	False
4.	Mark Changizi thinks that the lines that appear on wet fingers are connected with evolution.	True	False
5.	In experiments, it was discovered that people could move objects from underwater better with normal fingers.	True	False
6.	It is certain that wrinkled fingers are an evolutionary adaptation for wet conditions.	True	False

	6.	Smulders hopes that his colleagues will continue to this topic.						

Discussion

Do you think wrinkled fingers could be an evolutionary adaptation? When is it an advantage to grip things in wet conditions?

**Vocabulary Box** 

Write any new words you have learnt in this lesson.
